

**T**he SL-830 lamp is used specifically

on sewing machines. It utilizes an exclusively-designed and patented high-brightness diode light bulb. The irradiation area is large and the luminosity is uniform. It does not have the phenomena of concentrated light dots and non-uniform luminosity that are found in regular diode light bulbs. These phenomena cause human eyes to grow weary easily.

The exterior design is patented. The look is artistic and it is practical to use. The angle can be adjusted at will, and the luminosity can be adjusted so that the user can find his/her most comfortable luminosity settings and work more easily.

## Features:

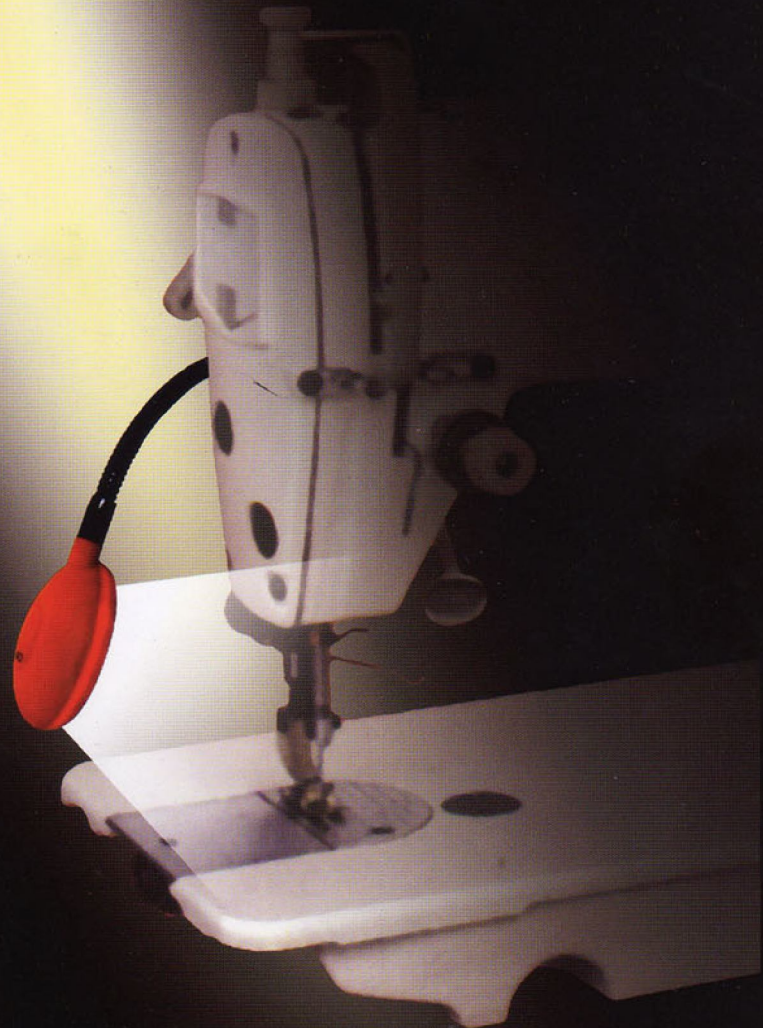

1. Energy-conservative. Does not generate heat. Light bulb does not have the lifetime limit as regular energy-conserving lamps or incandescent light bulbs do.
2. Easily installed in various brands and models of sewing machines.
3. 3-level luminosity settings.
4. Irradiation spots can be adjusted at will.

**P: 0.5W Lux: 1800**

Model: SL-830.110

Electricity: AC 100V  
110V  
220V  
240V

Flexible Length
